

Ideal complement to the SmartLane 90x and 91x Security Entrance Lanes, the SmartLane 935 swing gates allow buildings to be evacuated in an emergency and provide a wider lane for the mobility-impaired and cumbersome objects.

## Description

1. Self-supporting frame made from galvanized steel.
2. Housing made of stainless steel 304L, brush finish \#4.
3. Removable side panels with key lock.
4. Black laminate top cover.
5. Pivoting obstacle made of $12-\mathrm{mm}$ thick clear tempered glass.
6. Electromechanical unit consisting of:

- A three-phase asynchronous geared motor with an electromagnetic brake.
- Secondary transmission with crank-and-rod linkage ensuring perfect mechanical locking in both extreme positions.
- A variable speed controller ensuring progressive accelerations and gradual decelerations for a movement without vibration and increased user safety.
- A device to automatically open the moving glass obstacle in the event of a power failure (standard version opens in exit direction).

7. Bright pictograms:

- Operating pictogram, inside the cover plate, indicates what procedure to follow.
- Approach display, on the housing, indicating the state of the aisle.

8. Photoelectric cells for detecting presence, ensuring safe passage.
If the SmartLane 935 is not installed in group, a reflective strip must be installed on the opposite wall or surface (available as an option).

Note: This product is also available with a mobile obstacle 1000 mm high, with some modification of the housing.
Price upon request.

## CARACTERISTIQUES TECHNIQUES STANDARD

| Electrical supply | Single phase $230 \mathrm{VAC}(+/-10 \%)-5 \mathrm{~A}-$ <br> $50 / 60 \mathrm{~Hz}+$ Ground. <br> (Do not connect to a floating network or to high impedance <br> earthed industrial distribution network) |
| :--- | :--- |
| Consumption | 250 W (nominal) -600 W (max.) |
| Motors | Three-phase $240 \mathrm{~V} / 120 \mathrm{~W}$ controlled by <br> frequency inverter. |
| Operating tempe- <br> rature | $0^{\circ} \mathrm{C}$ to $+45^{\circ} \mathrm{C}$ |
| Opening speed | $4,5 \mathrm{sec}$ |
| Closing speed | $4,5 \mathrm{sec}$ |
| Weight | 141 kg |
| C€ | Conforms to EC standards |

Operating pictogram

## Work not included

(refer to installation drawing)

- Performing the electrical interconnection and connections to the power grid.
- Performing the connections to the access control systems.
- Anchoring the equipment with the appropriate hardware for your floor type.

## Options

- Mobile obstacle 1200 or 1900 mm high with a fixed glass obstacle of matching height.
- Personalized adhesive logo on fixed or mobile obstacle.
- Master/Slave operation.
- Heating for operation until $-20^{\circ} \mathrm{C}$.
- Power supply $120 \mathrm{~V}-60 \mathrm{~Hz}$.
- Stainless steel extremity panel with reflectors.
- IP interface - right or left housing
- Stainless steel top cover.
